INTRODUCTION

This list, arranged by subjects, gives the titles of the publications available from the Canada Department of Agriculture. The bulk of the material has been produced primarily for the use of farmers and others concerned with agriculture and related fields. It is not intended for use as classroom texts in schools and colleges and cannot be supplied for such purposes.

Only those publications that were actually in print or in press at the time this list was published are listed. New publications may have appeared in the meantime or the stocks of others may have become exhausted. If you do not find listed a publication that appears to provide the answer to your problem it is probable that information can be supplied in some other form if a letter outlining the difficulty is addressed to the Department.

Distribution

(1) Publications listed in this catalogue without any following price indication are available without charge, by individual copies, on request.

(2) Commercial and other organizations desiring bulk quantities of free publications for distribution will be quoted a rate on such bulk orders, sufficient to recover costs of printing and paper.

Types of Publications Available

Bulletins and circulars that give practical information on some specific phase of agriculture comprise the great majority of the publications available. These deal in general with such matters as cultural practices, varieties of crop plants, production of livestock and poultry, control of insects and plant diseases, preparation of farm products for the table, and many other matters. In some cases bulletins present in more scientific terminology the results of experiment and research with problems relating to agriculture. Such bulletins are generally printed in small editions and are intended mainly for the use of other scientists working in the same field, for educational institutions and libraries.

Another type of publication is the progress report. These give an account of the experimental and research work carried on in the various units of the department. They are issued at irregular intervals and where they are shown in this List of Publications the latest available report is always listed.

Still another class of publications is represented by the various Acts and Regulations that are administered by the Department.

Most of the bulletins listed herein carry a publication number which facilitates ordering. Some miscellaneous publications which do not properly fall into any of the above classifications also appear in the list.

How to Order Publications

When ordering publications from this list, use the publication number wherever it is given. Where no number appears use the full title as listed.

Do not enclose postage to cover mailing charges. This is unnecessary and involves extra time and trouble in returning it to the sender.

Do not ask for more publications than you are entitled to.

Orders for those publications that are for sale at a stated price should be sent directly to the QUEEN'S PRINTER, OTTAWA, accompanied by the necessary remittance.

Orders for free publications should be addressed to the INFORMATION SERVICE, DEPARTMENT OF AGRICULTURE, OTTAWA, ONTARIO.

Information on Subjects Not Listed

In addition to the items listed on the following pages, the Department has available a large volume of informative material in the form of processed leaflets, such as up-to-date information on new insecticides, weed control, etc. Because much of this is short-lived, the titles are not included in this list, but it should be noted that leaflets on many subjects not listed herein can be supplied on request.

If you do not find a publication that appears to fill your need, write to the Department and any available material will be sent.

ACTS, REPORTS AND PERIODICALS

Acts, Orders and Regulations

Agricultural Prices Support Act, 1944.
 Agricultural Products Co-operative Marketing Act.
 Animal Contagious Diseases Act and Regulations.
 Canada Agricultural Products Standards Act.
 Canada Dairy Products Act and Regulations.
